PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence & Data Science with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Data Analytics. Built and deployed multiple ML web applications including a Multi-Disease Prediction System and an AI-powered Face Recognition Attendance System. Proficient in the complete ML pipeline — data preprocessing, model training, evaluation, and deployment. Skilled in Python, Scikit-Learn, TensorFlow/Keras, Pandas, and Power BI. Seeking roles in AI/ML Engineering or Data Analytics.

TECHNICAL SKILLS

ML / AI	Scikit-Learn, TensorFlow, Keras, OpenCV, Deep Learning, NLP (basics)
Data Analytics	Pandas, NumPy, Matplotlib, Seaborn, Power BI, Advanced Excel
Languages	Python, SQL, JavaScript, C
Deployment	Streamlit, Flask, Django, REST APIs
Databases	PostgreSQL, MySQL
Tools	Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux
Core CS	Data Structures & Algorithms, OOP, DBMS, Statistics, Probability

PROJECTS

Multiple Disease Prediction System — Python · Scikit-Learn · Streamlit · Machine Learning

- Built and deployed an ML web application that predicts Diabetes, Heart Disease, and Parkinson's Disease from patient input data.
- Trained separate classification models for each disease using real medical datasets; achieved high accuracy through feature engineering and model selection.
- Deployed as an interactive Streamlit web app with a clean multi-disease prediction interface.

GitHub: github.com/Pankaj7223/Multiple-Disease-Prediction

AI-Based Attendance Management System — Python · Flask · OpenCV · Deep Learning · PostgreSQL

- Built face recognition pipeline using Computer Vision and Deep Learning to mark attendance from group photographs.
- Integrated automated report generation and PostgreSQL-backed attendance storage, eliminating manual data entry.

GitHub: github.com/pankaj7223/Group-Face-Recognition-Attendance-Management/

Data Analytics Dashboard — Power BI — Power BI · Advanced Excel · DAX

- Designed interactive Power BI dashboards with KPIs, slicers, and drill-through reports for business data analysis.
- Applied DAX formulas and data modeling to derive actionable insights from raw datasets.

GitHub / Report: github.com/pankaj7223/Power-BI-Lab

Loan Eligibility Prediction — Python · Scikit-Learn · Pandas · Django

- Developed ML model for loan eligibility classification with data preprocessing, feature selection, and model evaluation.
- Deployed prediction interface as a Django web application with a user-friendly input form.

GitHub: github.com/Pankaj7223/Loan-Eligibility-prediction

LEADERSHIP EXPERIENCE

Co-Lead — IoT Integration to AI, SISTec | 2024 – 2025

- Led student teams on IoT and AI-based projects; conducted technical workshops on ML and cloud deployment; mentored juniors on end-to-end project development.

CERTIFICATIONS

NPTEL — Joy of Computing Using Python · Data Structures & Algorithms in C (Udemy) · AWS Server Workshop · Power BI & Advanced Excel Training · Git & GitHub Seminar

EDUCATION

B.Tech — Artificial Intelligence & Data Science

SISTec GN, Bhopal | CGPA: 7.34 / 10 | 2022 – 2026
